Exam : 70-735

**Title : OEM Manufacturing and
Deployment for Windows 10**

Version : DEMO

1.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a new image of Windows 10 that contains a push-button reset solution.

You need to test whether push-button reset works as expected.

Solution: From Windows 10, you press and hold the SHIFT key, and then you restart the computer. After the computer restarts, you click Troubleshoot, and then you click Reset this PC.

Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

You are building a new image of Windows 10 that contains a push-button reset solution.

You need to test whether push-button reset works as expected.

Solution: From Windows 10, you open the Settings app, you click Update & security, and then you click Recovery. From Reset this PC, you click Get Started.

Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

References: <https://support.microsoft.com/en-us/help/12415/windows-10-recovery-options>

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/push-button-resetoverview>

4.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You run `dism.exe/Get-Packages`, and then you pipe the output to `dism.exe/Add-Package`.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

References: <https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/add-or-remove-packages-offline-using-dism>

5.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You copy all the updates to the same folder. You run `dism.exe/Add-Package` once and specify the `/PackagePath` parameter once.

Does this meet the goal?

A. Yes

B. No

Answer: B
