Title : Certified Tester Foundation Level Agile Tester

Version : DEMO

1.Which tasks are typically performed by a tester on an Agile project?

1) Implementing test strategy.

2) Documenting business requirements.

3) Measuring and reporting test coverage.

4) Coaching development team in relevant aspects of testing.

5) Executing test-driven development tests.

A. 2, 5

B. 2, 4, 5

C. 1, 3, 4

D. 1, 3

Answer: B

2.Which of the following statements would you expect to be the MOST direct advantage of the whole-team approach?

A. Having at least once a day an automated build and test process that detects integration errors early and quickly.

B. Avoiding requirements misunderstandings which may not have been detected until later in the development cycle when they are more expensive to fix.

C. Capitalizing on the combined skills of business representatives, testers and developers working together to contribute to project success.

D. Reducing the involvement of business representatives because of the increased communication and collaboration between testers and developers.

Answer: C

3.User Story: As a user I want to be able to calculate tax percentage based on amount of income.

What is the best black box test design technique for verifying the accuracy of this user story?

A. Statement testing - test all statements in income calculation.

B. User story testing - test that the user can enter an income amount and get a result.

C. State transition testing - test all states of income entry.

D. Equivalence partitioning - test with low, medium and high income.

Answer: D

4.Which of the following describes the main purpose of a task management tool in agile projects?

A. A task management tool is used by team members to share ideas and collaborate on assigned tasks.

B. A task management tool is used to manage and track user stories, tests and other tasks.

C. A task management tool is used to store source code and automated tests.

D. A task management tool allows developers to continuously integrate their code.

Answer: B

5.Which of the following statements is FALSE regarding early and frequent feedback?

A. Early feedback decreases the amount of time needed for system testing.

B. Early feedback promotes early discovery and resolution of quality problems.

C. Early feedback provides the Agile team with information on its productivity.

D. Early feedback helps to deliver a product that better reflects what the customer wants.

Answer: C
